STILL THEY COME.

But for the sale of a hundred shares Four More Big Mining Companies Were Incorporated Yesterday. Four more maing companies filed

of the stock exchange, it is proposed to present the Geyser company with a chromo representing a geyser in a desert throwing high in the air great streams of living water. Judge Colborn will make the presentation speech while G. B. Bothwell will respond for the company.

The listed stocks, generally speaking, were firm during vesterday's call. Bullion-Beck was especially so, and in plocks of fifty was want at \$6.50, being a decided advance over any previous quotation.

Geyser exhibited an upward tendenty and reached a sale of 100 shares at \$1.10, which was the only sale made during the call. Itah was also in decided at advancing figures, but no stock was offered.

The unlisted stocks were unusually quiet and were called on a weak narket. Dagmar of Tintic, however, made The Star Gold and Silver Mining

Ryan, Frank Knox and William M. Bradley, the other incorporators hold 10 shares each. The company will operate in the Vanderbilt mining district, its property consisting of the following mines and mining claims: The Iron, the Boomerang, the Brick, the Brick Extension, the Pulsor, the Clay, the Clay Extension, three-fourths undivided interest in the Webster mine, one-half interest in the Murray mine, one-half interest in the Mattle mine, all the Mill Site mine and claim; also the ten-stamp mill situated on the Mill Site claim. Allen G. Campbell is president; William A. Bradley, vice-president; Frank Knox, secretary and treasurer.

Cablegrams from Paris were received yesterday by the company, stating that the syndicate who had an option until May I on a control of the stock of the company, was sangular that it could handle the business successfully, and be in readiness to take up the option by the time it was fue.

MINING NEAR FARMINGTON.

Rich Geid Ore Found in the Hills Kear That Place.

F. H. Matthews of Orgen was in the city yesterday showing to his friends and acquaintances samples of ore from recent discoveries in the foothills north of Farmington canyon.

Mr. Matthews informs The Herald

Mr. Matthews informs The Herald

comes almost wholly from old and well known mines, no new producing mines to have producing mines or districts of importance being in evidence that it will dig to when it is remembered that it will dig to an direct that it will dig to an another when it is remembered that it will dig to a district a fine portance being in evidence that it will dig to a district a fine portance being in evidence that it will dig to a district a fine portance being in evidence that it will dig to a destrict a fine portance being in evidence that it will dig to a defer the station of Mercur-the Camp Floyd district—which have a for it holds more than gold along its rich bars.

Mr. Matthews of Orgen was in the country, and Park City surrenders to Eureka the position she has so long occupied as the greatest silver producer. It is also worthy of note that the Bullion-Beck mine produced more silver in 1835 than the Ontario.

The following table veryes in the foothills north of country.

Great is that Green River country.

Great is that Green River country.

Great is that Green River output of the Thirt destrict—which have the silver output of the Thirt district exceeded that of Summit country and Park City surrenders to Eureka the position she has so long or with the standard produced more silver produced more silver in 1835 than the Ontario.

The following table which may deed to its in

found.

The shaft is being sunk in rock and between the seams, the oil is continually seeping out. They are down only sixteen feet, but work is going steadily on. There are four men engaged on it, and they have a tent rigged up together with all, the necessaries to a miner's life out in the hills. One of

# **A Sufferer Cured**

"Every season, from the time I was two years old, I suffered dreadfully from erysipelas, which kept growing worse until my bands were almost useless. The bones softened so that they would bend, and several of my fingers are now crooked from this cause. On my

Sarsaparilla, would be sores, provided I was alive and able to carry anything. Eight bottles of

Ayer's Sarsaparilla cured me, so that I have had no return of the disease for more than twenty years. The first bottle seemed to reach the spot and a persistent use of it has perfected the curs."-O. C. Davis. Wautoma, Wis.

The state of the compromentation of the state of the compromentation "are there gushers to be found there?" It will take sinking to determine that question. The logical inference to be drawn is, that the oil now flowing has a source. Having a source it must be in goodly quantity to force its way up and out through the fine seams in the rock. If this be true, then why must there not be a great quantity of it? If in quantity, then it is again safe to assume that it is not confined to a small area, but is underlying many square miles of that country throughout. However, development work now going on ever, development work now going on will solve the question, and in the meantime there are a number staunch in the belief that oil in abundance is there, and that it is another industry added to Utah's many and varied

> DENVER CAPITALISTS LEAD OUT. Within the past few days there has been discovered vast deposits of manganese of iron, and only six miles from the station. Here again Denver capithe ten-stamp mill situated on the Mill Site claim. Allen G. Campbell is president: Frank Knox, secretary and treasurer.

> Cass Hite accompanied us—everybody knows Cass, a man who is right at home in the Green river country, as well as in divers other districts of the great west where the footprints of white men are not numerous. As a guide he is indispensible, and as a boon companion he is superb. He is fruitful of resources when in the desert and the parched tongue is given over to the horrors of an arid waste over to the horrors of an arid to the

A NEW COAL FIND.

Splendid coal has been found only ten miles from the station, and is opened up for about lifty feet. It is of the Castle Gate kind and the same thickness of vein. It is being hauled in by wagon and sells at the station for M per ton, delivered.

REAL FUNDAMENTAL TO SHOP THE STATE OF THE SHOP THE SHO

The week's dealings in stocks were generally inactive and unsatisfactory. Notwithstanding this fact, prices held their own fairly well, but speculation was narrow. It is difficult to attribute this lack of interest to any particular cause, other than that the investing public is not inclined to take hold at the present moment. Money is cheap and plenty and the market affords excellent opportunities to put away loose cash for a weak of the company of the cash for a weak of the c

and plenty and the market affords excellent opportunities to put away loose cash for a good present return and a good chance of improvement in value, with a consequent increase in profits.

Alax suffered a decline movement at the hands of an insider, but quickly regained practically all of its former strength. The mine reports were of the usual good character. Alliance was weak and inactive again. Anchor advanced a few points. This property is doing extremely well. Bogan held its own. Work has been renewed at the properties. Buillion-Beck has not yet announced its March dividend and none may come this month. The stock was considerably stronger, however, with inquiry quite active. The properties are reported to be in first-class

is being done at the mines, which are making a remarkably fine showing. making a remarkably fine showing.

The company is not pressing shipments. Dalton did conniderable business at slightly shaded quotations.

There is no good reason apparent for this decline. Development work at the properties is being prosecuted with renewed vigor. It is to be done in the future by contract. Dalty just about held its own. Dividend prospects are still uncertain. Dalty-West was strong, with increased inquiry. This property is in splendid shape and the mill is doing good work. Geyser has settled part of its suits and gained concessions. The stock did little business, however.

Horn Silver was quiet. Good ship-

development work is said to be making a satisfactory showing. Little Pittsburg weakened again as the assessment date came nearer, holders discounting the half cent that they will be forced to pay. Work is to be resumed when the snow leaves. Mammoth was in good derrand at about the previous week's figures. A break in the hoisting machinery caused a surpension of operations for a few days. It is the intention of the company to put in new holsting machinery in the near future. The new holsting machinery for the Morgan (Meears) should arrive within the next ten days. This stock showed fair strength.

The famous cyanide suit brought against the Mercur company has been amicably adjusted and, thanks to the keen business foresight and splendid

amicably adjusted and, thanks to the keen business foresight and splendid management of the directors, the company gained all the points desired. In the future the company will pay a small royalty, all back claims being settled by the payment of a nominal sum, which, together with the royalty, will not amount to the sum that would otherwise have been expended in the payment of the attorneys and court roots, even should the Mercur company have won in the long run. The local

representative last night, had hardly refreshed himself after the hardships of his long trip; but he stated that ground was now being graded at the April Fool mine for the new ten-stamp combination mil that was now being creeted. It is expected that this plant will be drouping by the last of June, when everything will go on as merrily as a wedding beil.

According to Mr. Wilson, the De Lamar mines are showing up in excellent shape, and the camp is growing rapitly. In speaking of the new Line district, in western from county, this state. Mr. Wilson stated that J. C. Lynch and James Clark would make a shipment of rich horn silver ove in April from the Ophir mine.

Ophir mine.
In commenting on this new district,
Mr. Wilson said that he understood that
the ledges there were very strong and
well defined, and that they were seamed
with streaks of exceedingly rich ore.
The Utah Spur, another of the mines
of the new district, is showing up well,
and the camp, prospectively, has a bright
future in stare for it.

Ore and Bullion. The ore and bullion receipts yesterday

were as follows: Commercial National bank, ores,

Wells, Fargo & Co., bullion, \$2,817. T. R. Jones & Co., ores, \$4,700. McCornick & Co., Hanauer bullion, \$3,825; ores, \$25,850.

Silver and Lead.

Mining Notes and Personals.

D. C. McLaughlin and W. V. Rice, well-known Park City mining men, are at the Knutsford.

located a short distance west of the Sunshine mine, in Camp Floyd district, that showed assay values of \$2.40 in gold to the ton. This ore was taken from a depth of only about eight feet. with inquiry quite active. The properties are reported to be in first-class
shape again.

Small blocks of Centennial-Eureka
sold around \$75, with little of the stock
offered. The regular double dividend
of \$1 per share is to come on Monday.
A vast amount of development work
is being done at the mines which are

Colonel Nick Treweek returned home Wednesday night from a four days' in-spection of the mineral wealth of Mer-cur, and to a Horald representative the colonel states that Mercur is a "great camp." During his stay there

and other portions of the camp.

W. T. Rives and James Covington, who have been employed at the Gold Dust, near Leesburg, Ida., came down from the mine yesterday and report that in the face of the forty-two-foot drift being driven from the bottom of the seventy-five-foot shaft, the vein has been cross-cut from wall to wall, a distance of seventy-two feet in doing governorm of its suits and part of its suits and the new development work is said to be making a satisfactory showing. Little Pitts burg weakened again as the assessment date came nearer, holders disment date came nearer, holders dismented and part of successions. The succession of successions are desired to be successively from wall to wain, has been cross-cut from wall to wain, has been cross-cut from wall to wain, a distance of seventy-two feet, in which there is a twenty-foot body of pay ore, some of which is very rich, showing free gold all through it. The new mill for the Gold Dust is to go in about May I.

The Sierra county, N. M., Ad-

tions is as good as the ge

SANDERS DE LE SERVE DE LE SERV

BEAR IN MIND-Not one of the host of counterfeits and imita-

ing in, the outlook for the mine is most encouragiting.

Hon. Joseph L. Rawlins of the Camp Floyd Mining company, now operating at Five Mile Pass, informs The Heraid that so far as known the ore body has not been encountered in the Camp Floyd shaft, although it has cut through the mineralized shale into a porphyretic formation that looks very promising, and through which there are small stringers of mineral, the general average of which, from recent assays, going \$3.40 in gold. Samples of rock from the Camp Floyd were brought in Wednesday night by Mr. Critchlow, but assays from them were not obtained yesterday.

At the drilling contest at Leadville.

Frank Wilson in From De Lamar With a Good Ore Shipment.

Frank Wilson of De Lamar, Nevada, arrived in the city last night and is registered at the Walker.

Mr Wilson, who is one of the owners of the April Fool mine, at De Lamar, Nevada, brings with him a shipment of fity-five tons of gold ore from this most promising property, which is now being scientifically developed.

Mr. Wilson, when seen by a Herald representative last night, had hardly refreshed himself after the hardships of his long trip; but he stated that ground was now being graded at the April Fool mine for the new ten-stamp combination mili Dwyer. The next best performance in Dwyer. The next best performance in that rock was made at the Festival of Mountain and Plain last fall, when O'Neal and Sullivan put in the steel 355-16 inches. Leadville now claims the championship of the world.

> Gold, Silver and Lend Mining and Milling company is now offering a limited amount of its stock for sale. The same can be obtained at the office of the company in the Commercial block or at the Bank of Salt Lake.

There is but one way to make boller compounds—analyze the water, find out what you have to overcome, and apply the proper remedies. Results—clean bollers.

Waters analyzed and written analysis with instructions mailed free of charge. The only company who do this is the Dearborn Drug and Chem-ical works, 31-32-33 Risko building. Chicago, Ill.

### AMUSEMENTS.

"MEXICO"-Ned Royle has done himself proud in his new play. Many who admired his "Friends" for its brilliant dialogue and original treat-ment, feared for him when they heard The clearings of the associated banks yesterday were \$223.014. For the same day last year they were \$154.989. of the melodramatic, where plot and action are everything, and dialogue merely secondary. "Mexico" showed them last night that their fears were thrown away. It is even more origina well-known Park City mining men, are at the Knutsford.

The Checkmate mine in Willow Creek though it has some very stirring district, Idaho, has been sold to F. L. Chapin of Ogden, Utah, for \$6,000 cash. crops shere is where they grow. They raise 70 bushels of oats and 40 bushels of wheat to the acre, and the fruit that is raised there is not excelled, and seldom equaled. It's the climate. No snow falls there, or if it does it fades on the high road to prosperity, and once again will it know nof Green River is on the high road to prosperity, and once again will it know the busy hum of industry and become a shipping point on a scale commensurate with the wonderful resources all about it. Another thing, the railway people will see that every facility is given it that may be required—it will not again go backward.

POLLOCK'S WEEKLY LETTER.

Weekly Review of the Mining Share Market.

James A. Pollock will say, in his weekly mining share market letter, under date of March 13, 1898.

The week's dealings in stocks were generally inactive and unsatisfactory National and the first and the second acts, such that a strict is being run from the bottom of the shaft in good ore.

Superintendent H. V. Carter, of the Morth Fork Placers, in Trinity county. Call, will leave for the dignines this foot what would be called that, for 35,000 cash. It is reported that the Cedrie lode. In the reported that the Cedrie lode, in the western foothills, Camp Floyd district, Idaho, has been sold to F. L. Chark for 35,000 cash. It is reported that the Cedrie lode. In the western foothills, Camp Floyd district, Idaho, has been sold to F. L. Chark for 35,000 cash. It is reported that the form in the substance with the western foothills, Camp Floyd district, Idaho, has been sold to F. L. Chark for Showing up in excellent shape, and that a drift is being run from the bottom of the shaft in good ore.

Superintendent H. V. Carter, of the Morth Fork Placers, in Trinity county. Call, will leave for the dignines this foot what a work on a large scale, and a most successful season is anticipated. It was not by any means, however, in the Mexican girl, most admirably which most interest centers is that of the Mexican girl, which is dialogue and his come

was the best piece of acting we have seen him do. It is no disparagement to him, however, to say that in our opinion he is a playwright first, an ac-tor second. Mrs Royle (Selena Fetter) contented herself with a comedy role, in which almost all she had to do was in which almost all she had to do was to wear some charming gown of the period of 1848 and to look handsome, which she did to the letter. Lucius Henderson as the Mexican villain con-tributed a picturesque and faithful sketch, and shared in the hearty wel-come given Mr. and Mrs. Royle. A sketch, and shared in the nearty welcome given Mr. and Mrs. Royle. A very pleasant impression was made by Miss Lyons as the sweetheart, and Mr. Johnson, the darkey, and Mr. Bitner, the major, were excellent. All the support was strong. The scenery was beautiful, and the third act, showing a view of the City of Mexico, got a hearty round of applause. The general opinion of the audience, a large and brilliant one, by the way, was that Mr. Royle has a heavy money maker in "Mexico." He is altering and improving all the time, with a view to having it as nearly faultless as possible when it reaches New York in the fall. We make one suggestion, and that is that some of the "cuss words" and the rather rough epithets, especand the rather rough epithets, especially those in the mouths of the women, be toned down a bit.

It will be seen for the last time tonight. Saturday night it is to be given in Ogden, and Monday the company opens in San Francisco.

THE TAVARY COMPANY-Fred Schwartz, representing the Tavary Opera company, arrived in the city yesterday. Their dates are the 27th and 28th, and while the repettory has not yet been decided upon, it is prob-able that a double bill, consisting of "Lucia" and "Cavalliera Rusticana." will open the engagement TABERNACLE TONIGHT-Tonight

from the mine yesterday and report that in the face of the forty-two-foot drift being driven from the bottom of the seventy-five-foot shaft, the vein has been cross-cut from wall to wall, a distance of seventy-two feet, in which there is a twenty-foot body of pay ore, some of which is very rich, showing free gold all through it. The new mill for the Gold Dust is to go in about May I.

The Sierra county, N. M. Advocate calls attention to a trick, not uncommon in these days of leasing to cover up an ore body or pocket while the mine is in the hands of the novitiate owner. Typort the mine 25 "no good." "too low grade," or "played out," and afterward get a lease on the property and stope out the ore which was clandestinely hidden. This is usseries of concerts inaugurated by the
